PROFILE

Full Stack Developer passionate about building scalable web applications and emerging AI technologies, including Machine Learning and Generative AI.

EXPERIENCE

SKY360.AI TECH LLP

2026

Worked as a Software Engineer, developing and customizing reusable React components across HRMS and DMS modules. Analyzed application architecture, understood data flow and database interactions, and made feature enhancements across end-to-end workflows. Collaborated on debugging, issue resolution, and requirement discussions.

EDUCATION

Canara Engineering College

Mangalore, India

Bachelor of Engineering in Artificial Intelligence and Machine Learning

2022–2026

Vidyodaya PU College

Udupi, India

PUC (12th)

2020–2022

G M Vidyaniketan Public School

Brahmavar, India

SSLC

2019–2020

SKILLS

Technical: JavaScript, Python, NodeJS, ExpressJS, ReactJS, MongoDB, SQL, PostgreSQL, Machine Learning

Tools: Tableau, Power BI, Postman, Git, Docker

PROJECTS

Connectify

2025

Developed a full-featured MERN application for real-time language exchange, chat, and video calls with a modern responsive UI.

Implemented secure authentication, real-time messaging, and one-on-one video calling using Stream SDKs, React Query, and JWT-based sessions.

Tech Stack: React, Node.js, Express, MongoDB, TailwindCSS, DaisyUI, Zustand, Stream Chat/Video, Cloudinary

Texel

2025

A full-stack AI-powered application for generating high-quality images from text prompts with a modern and responsive UI.

Integrated ClipDrop API for text-to-image generation, implemented Razorpay payment gateway for credit based usage, and added features like image download.

Tech Stack: React, Node.js, Express, MongoDB, TailwindCSS, Cloudinary, ClipDrop API, Razorpay

AiGit

2024

Built a Git alternative that executes version control commands directly from natural language inputs, making it easier for beginners to use Git operations.

Designed a command parsing engine that converts user text into Git operations and bundled the system into an installer for easy distribution.

Tech Stack: Python, Inno Setup

CERTIFICATIONS

- Unlocking the **Basics of Machine Learning** Certificate from Accolade Tech Solutions Private Limited.
- **Internet of Things** Workshop Certificate from Kakunje Software.
- **Information Security System** Workshop Certificate conducted at NITK, Surathkal.
- **Basics** and **Intermediate JavaScript** Certificates from HackerRank.
- **Frontend Developer (React)** and **React (Basic)** Certificates from HackerRank.

ACHIEVEMENTS

- Secured **Third Place** in the Lazarus Missions Hackathon on Machine Learning and Signal Processing organized by IEEE at NITK, Surathkal.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Kannada
- Participated in **2 Hackathons** and **1 Ideathon**.
